Experienced and reliable Software Engineer. Specialized in **Web Front-End Development with React.js** and a strong background in Back-End. Passionate for creatively delivering solutions to concrete problems with the help of web technologies.

EXPERIENCE

Senior Software Engineer Front-End

June 2022 – current

eBay, Dreilinden

- Improved customer experience for buying bulky items in a cross-team, cross-border collaborative effort, working on the most important pages in eBay (Checkout and View Item) - **React.js, Marko.js, Node.js**
- Implemented a new shopping guide experience for costumers to help them find the right product, with a solid 2-5% conversion rate – **HTML, CSS, JS**
- Won an internal competition, by making key contributions to a prototype focused on enhancing the trading card collection experience at eBay. I had the honor of pitching the idea to eBay global leadership – **React.js, Node.js**
- Realized several legally required changes the cancelation process at eBay Plus and extended the cancelation experience to native apps, to prevent them from being kicked off the app store – **React.js, Node.js, Scala, Java**

Full-Stack Software Engineer | Founder

Mar 2021 – current

Webentwicklung 030 Berlin GmbH, Berlin

- Website design, creation, and SEO optimization - **React.js**
- Implementing interfaces to external job boards for automatic transfer of jobs - **REST API**
- Self-Developed Website Management System for customers - **React.js, Node.js**
- Online analysis tool to automatically test webpages for different quality criteria - **React.js, Node.js**
- CRM Web-Application for recruiting of personnel – **React.js, Node.js**
- Chrome Extension to automatically scrape data with direct interface to the CRM Application - **REST API**
